Member body officials to keep one copy and forward one copy together with identifying photographs which must clearly show features to identify fish, 3 meters of line and the full leader inclusive of the hook trace and hook. With effect from 1 January 2006 all records are awarded for length of fish. Measurement method will vary for different species, measured in a straight line from the tip of the snout to the tip of the tail, (TL) for guitar fish and some shark species, i.e. gully sharks and bony fish with a truncated tail, to the inside of the fork length (FL) for fish with a swallow tail: and to the pre-caudal notch (PL) for most sharks, across the width of the disc (DW) for rays. Measurement to be rounded down to the nearest centimeter. Record claim to be posted to: The SASAA Records Officer, Thys Kemp, Lausanne Singel 13, La Rochelle, Bellville, 7530 within 90 days of catch.
